

.Dvolver Moviemaker

<http://www.dfilm.com/live/mm.html>

To use Dvolver <http://www.dfilm.com/live/mm.html>

Simply go to the Dvolver site and click on the movie maker image.

Select one, then click Next and choose the scenario you want to use.

Again, click Next and then select your characters.

Once you have the characters click next and add the dialogue for each character. Text is limited to 100 characters per line.

Once you have added your dialogue you can add background music. Select the music. Simply music you like.

Now you can click to add another scene and repeat this process or you can click to finish the movie. To finish the movie you give it a **title** and your name and choose a background design.

Then click on preview and send.
